Enterprise Communications · Best Value Leader

TAC600-16S is a cost-effective VoIP access gateway for seamless enterprise migration. It enables modern VoIP adoption without replacing legacy analog old phones, fax or wiring, offering zero-replacement, zero-rewiring, zero-risk

upgrade with integrated Gigabit routing, auto-provisioning and TR-069 management.

Core values :

Integrated Multi-Service – Data, voice, security & VPN on a single device.

IP Access Solution – Flexible broadband, voice & fax for operators & enterprises.

Security & Reliability – Built-in encryption, firewall, redundancy & self-healing.

IP-PBX Compatible – Enables cross-region voice networks for government, corporate & campus use.

Application Scenarios:

Campus/Industrial – Enable voice, broadcast & intercom over existing IP networks.

Business Communication – Bridge legacy & IP phones with fax support in cost-effective deployments.

Cross-site Networking – Connect branches over IP for toll-free internal calls & centralized trunks.
