SIP extensions, up to 600

100 Call
Concurrent calls

4 × FXO
RJ11 · PSTN lines

2 × GbE
WAN · LAN (RJ45)

10 W
12 V DC power

DESCRIPTION

The UVM100/4O is a compact yet robust IP-PBX server and audio paging server in one. It is the control center for voice communication in offices and buildings, handling internal phone calls and managing announcements (paging) to IP speakers from a single device. Four FXO ports connect PSTN lines directly to the IP system, while built-in Call Recording supports quality control and call archiving.

FEATURE

- IP-PBX + Audio Paging Server
- 100 SIP extensions, up to 600
- Up to 600 SIP trunks (license)
- 100 concurrent calls
- 4 FXO ports for PSTN lines
- Built-in Call Recording
- Audio/Video Intercom & Nurse Call
- 2 × Gigabit Ethernet, 10 W power

SPECIFICATION

MODEL	UVM100/4O
Device type	IP-PBX Server & Audio Paging Server
SIP device license	100 (standard)
Max. users	Up to 600 (additional license)
SIP trunks	Up to 600 (additional license)
Concurrent calls	100
Network	2 × Gigabit Ethernet RJ45 (WAN, LAN)
FXO ports	4 × RJ11, PSTN lines
Console	1 × RJ45, management port
USB	1 × USB
LED indicators	PWR · SYS · SFP
Others	Reset button (RST), ground terminal
Power supply	12 V DC
Power consumption	10 W

TYPICAL USE

- Office & building telephony
- Paging to IP speakers
- Audio / Video Intercom
- Hospital & clinic nurse call

INTEGRATION

SIP · FXO / PSTN
Call Recording · Paging

Works with PSTN lines, IP phones, IP speakers, intercoms and nurse call systems.
