Adjustable
Tilt angle

6 bolts
Hex tilt lock

70 × 70 mm
Top hole spacing

105 × 100
Base, mm

Universal
Camera, light, sensor

DESCRIPTION

The TCM-BR1232JS is a universal joint mounting bracket with an adjustable tilt angle. Its white-painted metal body is made of two plates joined by a side hinge, so the top plate can be tilted to point a device exactly at the area it needs to cover, then locked in place with hex bolts on both side hinges. A mix of round holes and elongated slots gives flexible fastening with screws or bolts. It fixes to walls, ceilings or other flat surfaces and suits CCTV and PTZ cameras, floodlights, sensor boxes and small projectors.

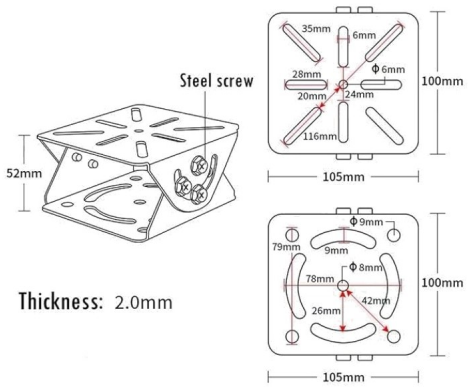

FEATURE

- Adjustable tilt angle
- Two plates joined by a side hinge
- Round holes and slots for flexible fastening
- 6 hex bolts lock the tilt angle
- Wall, ceiling or flat-surface mounting
- White painted metal body

SPECIFICATION

MODEL	TCM-BR1232JS
Type	Universal joint mounting bracket
Adjustment	Tilt, via side hinge
Angle Lock	6 bolts, 3 per side hinge
Base Size (W × L)	105 × 100 mm
Top Hole Spacing	70 × 70 mm
Height (flat)	52 mm
Plate Thickness	2.0 mm
Fixing Holes	Round holes and slots
Mounting Surface	Wall, ceiling, flat surface
Compatible With	CCTV / PTZ camera, floodlight, sensor box, small projector
Material	Metal
Finish / Color	White paint

DIMENSION

105 × 100
Base (mm)

52 mm
Height

70 × 70
Holes (mm)
